

Paper Umbrella Wreath

Materials List

- 10 Inch Foam Wreath Base
- Cocktail Umbrellas (40 total)
- Yarn to hang it up (you can also wrap the wreath first if you would like)
- scissors

Instructions:

1. Open the cocktail umbrellas. This can be a bit tricky! First, you have to remove the small rubber band around the outside of the umbrella. Then push the rubber band on the base of the umbrella up to open it.
2. Delicately stick the umbrellas in the foam wreath. Alternate the colors randomly to make the design more fun. Make sure the tops of the umbrellas overlap to hide the base of the wreath. It is important to place them at the correct angle to create the pattern. Don't get discouraged if there are a few broken umbrellas in the process ☐
3. Work your way around the wreath to create full coverage with the umbrellas.
4. The last step is to look for any open spots on the wreath that you might have overlooked
